Q-Ion is the ultimate material for sealing entry doors. Q-Ion is a unique urethane foam seal that stands up to temperature and time better than other seals. Resistance to compression set, the ability of seals to spring back into shape after being squeezed repeatedly is the single most important factor in distinguishing sealing performance. All doors move. When the weather gets warm, all doors expand. When it gets cold all doors contract. Expansion puts an extreme compressive load on a door seal. Contraction can remove a door from contact with the seal. Q-Ion door seal is designed and field proven to move with a door, through expansion and contraction. Q-Ion will take severe compression and then rebound into its original size and shape. 97" PH2 Magnetic available by special order. (Please contact your sales representative)

## TPE MAGNETIC SEAL

Size	Part#	Unit Price	Box 100pcs	5 Box	Availability
37"	WSMAGTPEWH37				*
81"	WSMAGTPEWH81				*

## TPE COMPRESSION SEAL

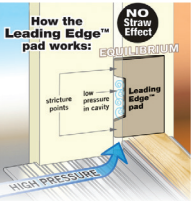

Size	Part#	Unit Price	Box 100pcs	5 Box	Availability
81"	WSCOMTPEWH81				*

## FEATURES

1. Magnetic seal is pulled to the door for a tight seal.
2. Compression seal is for use on hinge jamb.
3. Opaque formulation prevents light from shining through.
4. UV resistance thermo-plastic and thermo-rubber compound.
5. Stable over a wide range of temperatures (will not shrink)
6. Stocked in white. Beige and brown available by special order. (Please contact your sales representative)
7. 97" available by special order. (Please contact your sales representative)
